

YOU can help build the Tampa Bay Solar System!

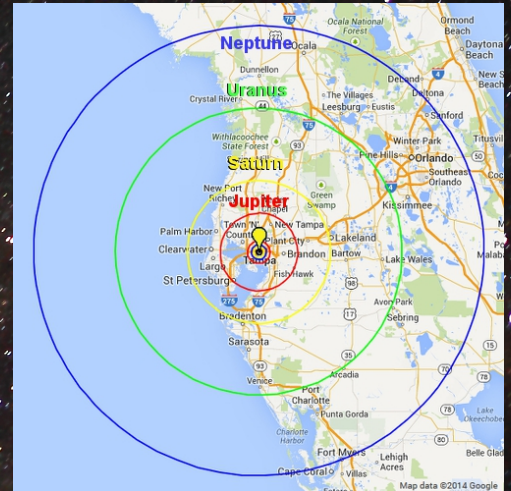

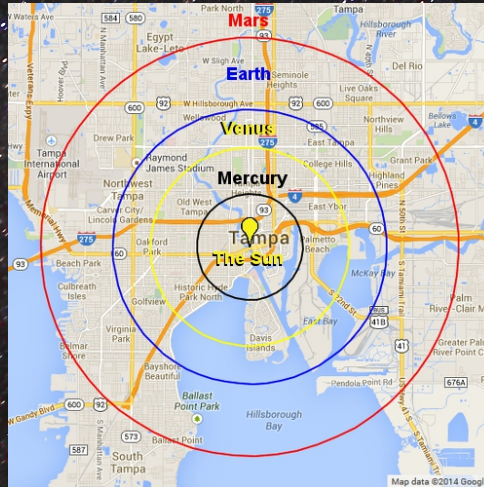

It's the largest scale model of the solar system in the country, covering the entire Tampa Bay region and beyond. Anyone can help build it!

Here's how it works:

Rivergate Tower represents the Sun.

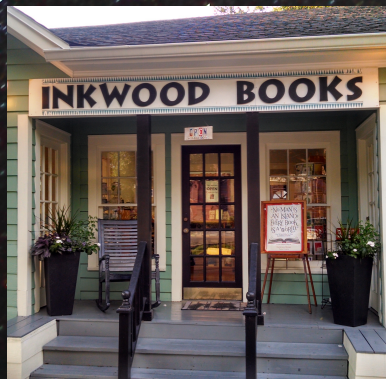

Based on the Sun's location and diameter, we can determine the size and location of all the other models.

We make models like this:

And place them in the proper orbit in locations like this:

Join us! It's fun!

Lots more info, including detailed orbit maps and ideas for models, is at tampabaysolarsystem.org.
